Hackensack Meridian Health’s Division of Gynecologic Surgery provides treatment for a wide range of malignant and non-malignant conditions affecting the women’s reproductive system. Our dedicated team of specialists is committed to achieving the best possible outcomes for each of our patients.

At Hackensack Meridian Health, we understand that gynecologic surgery is a very personal and sensitive issue, and also recognize that women often have busy schedules filled with family, work, and a variety of other responsibilities. We provide an array of therapeutic options in caring environments that respect the needs of every patient we treat.

Meridian Cancer Care: Your Partner in Providing Personalized Treatment

With a focus on dignity and compassion, Meridian Cancer Care is committed to achieving the best possible outcomes. As the only system partner of Rutgers Cancer Institute of New Jersey, our team provides an unmatched level of clinical excellence and expertise, supported through innovative solutions and technologies, collaborative research, and participation in the latest clinical trials.

Our Multidisciplinary Approach to Care

With a multidisciplinary approach and open lines of communication among specialties, we are making strides in cancer treatment ranging from diagnosis to survivorship. A multidisciplinary team may include the referring physician, medical and radiation oncologists, surgeons, radiologists, nurse navigators and other related specialists. Together, as a team, we take a prospective view of each case prior to recommending treatment options. We will work closely with you so you are well informed about your patients’ course of treatment and any future interventions that may be needed, such as chemotherapy. Other members of the team can include research nurses to help determine eligibility for a clinical trial, a social worker and/or palliative care nurse to assess family and personal needs or concerns.

In order to optimize treatment plans and scheduling needs, patients will have the opportunity to see their cancer specialists during the same visit. A nurse navigator will also be by their side every step of the way to provide support and guidance.
